Subject: NTELOS GPS Handset update

The purpose of this letter is to inform you about progress NTELOS has made toward having 95% of NTELOS customer handsets capable of sending Phase II wireless location information to Public Safety Answering Points (PSAPs). The Federal Communications Commission (FCC) had previously ruled that wireless providers needed to have 95% penetration of GPS capable handsets on their respective networks by December 31, 2005. NTELOS petitioned the FCC for an extension of this deadline and was granted an extension until November 1, 2006. NTELOS is

required to inform the PSAPs of its progress towards reaching the goal of providing 95% of its customers with GPS capable handsets. As of January 1, 2007, 95.63% of the handsets on the NTELOS network are GPS capable. NTELOS is continuing in its efforts to encourage subscribers that currently do not have GPS capable handsets to convert to new handsets that are GPS capable. If you have questions about NTELOS' progress toward the GPS handset goal, please contact me at bensona@ntelos.com.

Thanks,

Amber Benson
